SUMMARY

Certified Ethical Hacker (CEH) and cybersecurity analyst with hands-on experience in vulnerability assessment, penetration testing, and responsible disclosure. Known for a detail-oriented approach to identifying security weaknesses and supporting remediation efforts. Skilled in web application security, API testing, and technical documentation. Focused on continuous improvement and contributing to secure digital environments.

WORK EXPERIENCE

Cyber Support Threat Analyst - EzeeFlights

Mar 2025 - Nov 2025

- Performed penetration testing using Burp Suite, SQLMap, and manual testing methodologies to identify vulnerabilities like SQL injection, account takeover, and other misconfigurations.
- Authored detailed vulnerability reports and assisted management in prioritizing remediation efforts based on severity.
- Supported initiatives to reduce fraudulent third-party ad clicks by validating traffic patterns and improving platform integrity.
- Strengthened platform security by supporting patch deployment and hardening measures

CyberSecurity Analyst Intern - SwiftSafe

June 2024 - Aug 2024

- Conducted testing of an automated tool to detect top 10 API vulnerabilities (OWASP), ensuring the tool functioned as expected.
- Reported bugs and issues to the development team, contributing to iterative improvements in the tool's performance.
- Created detailed documentation for the tool, facilitating its use and understanding by others
- Collaborated with a team to test and validate the tool in a complex application security environment.

EDUCATION

Bachelor's of computer application

June 2021 - July 2024

JB Knowledge Park

High School, Commerce

April 2019 - June 2020

BR Tyagi Sr Sec School

Achievements

- Bug Bounty Recognition:** Identified critical vulnerabilities and received acknowledgments from IndiaMart, Nestle, and LG through responsible disclosure programs
- Digital Forensics Case Study:** Conducted forensic analysis on a compromised system using Autopsy, FTK Imager, and UFED. Recovered deleted files and identified unauthorized access
- Ad Click Fraud Defense Mechanism:** Implemented a redirection validation system to detect and block fraudulent ad clicks, reducing fake ad activity by 80%.

SKILLS

- Technical Skills:** Penetration testing, Python, Ethical hacking, Burp suite, Linux, Bash scripting, Nmap, Web application vulnerabilities, Mobile Forensics, Application Security
- Languages:** English, Hindi

Certifications

Certified Ethical Hacker : EC Council

Certificate ID - ECC5091268374
